on the investment project:
«Disposable plastic tableware production organization
on FEZ Gomel-Raton territory»

The investment project “Disposable plastic tableware production organization on FEZ Gomel-Raton territory” was developed to find foreign investor for the production organization.

The relevance of the project is stipulated by absence of large serial production of disposable plastic tableware in the republic. Due to expert valuation the volume of disposable plastic tableware sales increases by 10-15% annually.

The project is on pre-investment stage. Feasibility study of the project is done, the business plan is developed, the production technology is defined.

The project stipulates establishment of high technology production for a wide range of disposable plastic tableware by molding method using the newest equipment of high output capacity of the Austrian company “General Plastics”. Due to the modern production technology the product will be price-competitive with ideal quality characteristics meeting highest consumer standards.

For the project realization there are available production premise (620 sq. m for equipment installation, 280 sq. m for warehouse) with all necessary infrastructure and engineer communications.

Terms of the project realization is 5 years, dynamic terms of recoument is 3 years and 11 months.

It is planned to create 54 new working places.

The project investment cost is EUR 3,082 mln., including EUR 2,397 mln. of fixed capital, EUR 0,503 mln. of working capital, EUR 0,182 mln. of other expenses.

Disposable plastic tableware production is the main type of the enterprise activity.

The disposable tableware is supposed to be produced colourless as well as in white with colour polygraphy applications. The range of disposable plastic tableware meant for production (plastic cups of 200 and 500 ml in volume, coffee pots of 200ml, one-, two-, three-section plastic dishes of 170, 205, 220 mm in diameter, soup dishes of 0,6 l in volume, table set-up: forks, tea spoons, mixes) will fully be demanded on the local market.

At the end of the fourth year of the project realization when the enterprise reaches its full capacity, the annual production volume will exceed 460 millions of items accounting on the basis of quantities.

Gains earned from product sales amounts to EUR 33,617 mln., EUR 6,26 mln. of net profit.

Project realization on the territory of free economic zone Gomel-Raton lets foreign investor, as FEZ resident, save EUR 1,88 mln. on tax incentives and customs duties.
